## **small block Windsor Marine - Free ...**

Although sometimes called the "Windsor" family by enthusiasts, Ford itself never named the engine family; the designation was only adopted to distinguish the 351 cu in (5.8 L) version from the Cleveland 335-family engine that had the same displacement, but a significantly different configuration.

## Guys

The 351W nodular-iron crankshaft has larger main and rod journals than the 289/302, along with a longer stroke. With this crank came longer connecting rods (5.956 inches) than you find inside the 289/302. New for 1969 was the only 351W-4V engine ever produced with 10.7:1 compression ratio.

mildly beefed, free breathing, easy rolling (balanced) 351w for my inboard/outboard 20 ft deep V runabout. Any comments regarding the intake manifold and carb would be appreciated. I notice newer 5.7' marine's are rated at about 5000 rpm so that is probably the practical limit for a marine motor.
