For those without a copy of the previous edition, *Managing Change: A How-To-Do-It Manual for Librarians* would be equally valuable as an addition to a library and information science (LIS) program's collection or to any self-improvement-minded library administrator's personal collection. This recommendation is made despite Gorman's statement above on temporal distance from administrative training and the somewhat high price for a relatively slim volume.

This clear and concise manual will help librarians understand licenses so that they can become better reviewers, drafters, and negotiators. Libraries purchase or subscribe to countless resources that are governed by licenses—both digital products and physical objects like rare books or equipment. Many librarians, however, lack the legal expertise to comprehend and assess the clauses found in licenses. Authors Corey Halaychik and Blake Reagan have reviewed and edited thousands of contracts and use the lessons they've learned to help librarians sort through the often archaic and confusing language found in licenses. Library Licensing is a key reference for anyone responsible for reviewing, editing, negotiating, and agreeing to licenses that govern library resources. It contains essential information that will allow the reader to not only understand the language used in contracts but also to replace confusing and redundant language with clear and concise alternatives. Organized with ease of use in mind, chapters are written for quick and easy consultation and application. In-depth coverage of terms used in library contracts Clear and concise definitions of common contract language Guidance on how to make contract language less confusing Step-by-step tips for reviewing, editing, and negotiating contract language

Libraries are integral parts of communities, and patrons have visited them in record numbers over recent years. According to the American Library Association, 64 percent of people surveyed in the United States have visited their local libraries in the past year. Branch librarians especially are striving to meet the various needs of their communities—in addition to books and Internet access, many branch libraries have videos, books on tape and CD, DVDs, and even art prints available to their patrons. This handbook covers a wide variety of issues that the branch librarian must deal with every day. Chapters are devoted to mission statements (the Dallas Public Library and Dayton Metro Library mission statements are highlighted as examples), library systems, boards of trustees, friends of libraries, administration, bosses, professionalism, professional organizations, time management, effective supervision, staffs, security guards, computer databases, courier services, branch management, collection development, service desks, homeschoolers, Spanish-speaking patrons, homeless patrons, problem patrons, community, programming, and outreach.
