#1 New York Times bestselling author Joyce Meyer teaches readers how to transform their lives by tapping into the power of hope. One of the most powerful forces in the universe is hope -- the happy and confident anticipation that something good is going to happen. Regardless of where one is in life, it is impossible to live successfully and to the fullest without hope. With Get Your Hopes Up! Joyce will help readers achieve a lasting sense of hope, built on their faith in God. Hope is only as strong as its source. This book will help readers avoid misplacing their trust in unreliable things, and help them ground their hope steadfastly in God for limitless joy and possibilities for their lives. As Joyce explains, "Without hope in God, there isn't much you can do, but with Hope in God, there isn't much you can't do."

The Sciences of the Soul is the first attempt to explain the development of the disciplinary conception of psychology from its appearance in the late sixteenth century to its redefinition at the end of the seventeenth and its emergence as an institutionalized field in the eighteenth. Fernando Vidal traces this development through university courses and textbooks, encyclopedias, and nonacademic books, as well as through various histories of psychology. Vidal reveals that psychology existed before the eighteenth century essentially as a " physics of the soul, " and it belonged as much to natural philosophy as to Christian anthropology. It remained so until the eighteenth century, when the " science of the soul " became the " science of the mind. " Vidal demonstrates that this Enlightenment refashioning took place within a Christian framework, and he explores how the preservation of the Christian idea of the soul was essential to the development of the science. Not only were most psychologists convinced that an empirical science of the soul was compatible with Christian faith; their perception that psychology preserved the soul also helped to elevate its rank as an empirical science. Broad-ranging and impeccably researched, this book will be of wide importance in the history and philosophy of psychology, the history of the human sciences more generally, and in the social and intellectual history of eighteenth-century Europe.

This White Electronic Service Technician Supervisor Notebook / Journal makes an excellent Birthday, School, Graduation or Christmas gift for anyone that loves to follow their passion.

Hospitality & Tourism in the World of Work series provides an age-appropriate and interactive introduction to the nationally recognized Hospitality & Tourism career pathway using informal self-assessment elements, career profiles, informative sidebar features, and back matter activities.

You'll find step-by-step strategies to harness the power of your imagination to wipe away resistance to your sales presentations ... become an irresistible "master closer" ... conquer self-defeating habits ... and use stress to your advantage.

Despite great progress around the world in getting more kids into schools, too many leave without even the most basic skills. In India's rural Andhra Pradesh, for instance, only about one in twenty children in fifth grade can perform basic arithmetic. The problem is that schooling is not the same as learning. In The Rebirth of Education, Lant Pritchett uses two metaphors from nature to explain why. The first draws on Ori Brafman and Rod Beckstrom's book about the difference between centralized and decentralized organizations, The Starfish and the Spider. Schools systems tend be centralized and suffer from the limitations inherent in top-down designs. The second metaphor is the concept of isomorphic mimicry. Pritchett argues that many developing countries superficially imitate systems that were successful in other nations— much as a nonpoisonous snake mimics the look of a poisonous one. Pritchett argues that the solution is to allow functional systems to evolve locally out of an environment pressured for success. Such an ecosystem needs to be open to variety and experimentation, locally operated, and flexibly financed. The only main cost is ceding control; the reward would be the rebirth of education suited for today's world.

His Excellency Benjamin Mkapa was Tanzania's third president, elected under the first multi-party general election in Tanzania. His memoirs range from his childhood, time as president, and his continuing post-retirement involvement on the international stage of development and peace mediation. This book will appeal to readers interested in: an African's personal experiences of colonialism in East Africa; the struggle for independence by the liberation movements of several African countries; how war helped unify the diverse citizens of a young nation; fostering nationalism and addressing ethnic and religious differences; the economic and social aspects of transition to socialism and then to a free market environment; the political transition from a single party state to multi-partyism; and relations with international organisations and development partners. During the ten years of his presidency he undertook substantial reforms, such as the privatisation of national assets, securing international debt relief and restructuring the public service. His Excellency writes of his childhood, his political maturation, the evolution of the State and politics in Tanzania, as well as some political upheavals in neighbouring countries. These memoirs are enriched by his views on leadership and advice for aspiring leaders. After Julius Nyerere, few books have been written by senior Tanzanian leaders on the evolution of Tanzania; in fact more literature has been produced by foreigners than Tanzanians, thus H.E. Mkapa's memoirs are a milestone. This book will appeal to aspiring leaders; students of development, international politics and diplomacy; those working for development partners; historians and those who want to know more about their Tanzanian heritage.
