This book is designed to explain the technical ideas that are taken for granted in much contemporary philosophical writing.

Notions like denumerability, modal scope distinction, Bayesian conditionalization, and logical completeness are usually only elucidated deep within difficult specialist texts. By offering simple explanations that by-pass much irrelevant and boring detail, Philosophical Devices is able to cover a wealth of material that is normally only available to specialists. The book contains four sections, each of three chapters. The first section is about sets and numbers, starting with the membership relation and ending with the generalized continuum hypothesis. The second is about analyticity, a-priority, and necessity. The third is about probability, outlining the difference between objective and subjective probability and exploring aspects of conditionalization and correlation. The fourth deals with metalogic, focusing on the

contrast between syntax and semantics, and finishing with a sketch of Gödel's theorem. Philosophical Devices will be useful for university students who have got past the foothills of philosophy and are starting to read more widely, but it does not assume any prior expertise. All the issues discussed are intrinsically interesting, and often downright fascinating. It can be read with pleasure and profit by anybody who is curious about the technical infrastructure of contemporary philosophy.

The Flivver King stands among the finest of modern American historical novels. It is history as it ought to be written - from the bottom up and the top down, with monumental sensitivity to the compromise and conflict between the two extremes. Its two stories - those of Henry Ford and Ford-worker Abner

Shutt, unfold side by side, indeed dialectically. They are, in the end, one story: the saga of class and culture in 'Ford-America'. Workers and bosses, flappers and Klansmen, war and depression, Prohibition outlaws and high-society parties, unions and anti-union gun thugs - few aspects of American life in the first four decades of the last century are missing from this small masterpiece. The Flivver King sustains the same sure grasp of working class life which characterized Sinclair's earlier classic, *The Jungle*, but much less sentimentally and with a steadier focus on how alienated work breeds not only degradation but also resistance and revolt. Originally written in 1937 to aid the United Automobile Workers' organizing drive, *The Flivver King* answers the question "Why do we need a union?" with quiet eloquence.

The Charles H. Kerr Company has reissued it as a great American novel and an important historical document, because that question has never gone away and is now more vital than ever. With an introduction from Steve Meyer.

There's a hardnosed new training officer in town, and that's bad news for the Bachelor Firemen of San Gabriel . . . But great news for firefighter Sabina Jones . . . maybe. The toughest captain on the East Coast, single father Rick Roman has come thousands of miles to San Gabriel to put an end to the "Bachelor Firemen" media hype. But when a stunning woman he nearly hooked up with in Reno turns out to be a firefighter from his new station, Roman realizes it's going to be tough keeping the tabloids at bay. But there's even more

Sabina isn't telling him. Before dedicating herself to battling blazes, Sabina led a very different life, one that made her famous. The last thing she wants is to have her secret exposed. The papers, bloggers, and TV gossips will have a field day with that—especially when they sense the obvious sexual heat between Sabina and Chief Roman, who's torn between firing her . . . and falling in love with her!

A collection of reminiscences illuminating the life of an elusive, ground-breaking American writer. In 1912, Sherwood Anderson suffered the mental and artistic break that has since become a firmly embedded legend in American literary history. A successful businessman in Ohio, he began to speak incoherently while dictating a letter at his desk and

walked out of his office, to be found four days later and a hundred miles away, disoriented and exhausted. Within weeks, he had quit his former life, moved to Chicago, and become the writer who would produce, among other works, *Winesburg, Ohio*, the landmark collection of stories which transformed American literature by disregarding the norms of realism and naturalism and foregrounding the lyrical voices of the isolated in a distinctive, modern way. Anderson served as a mentor to writers like Faulkner and Hemingway early in their careers and befriended a remarkable number of American writers, among them, Carl Sandburg, Ben Hecht, John Dos Passos, James T. Farrell, Gertrude Stein, Henry Miller, and Anita Loos. Anderson was notoriously elusive, and autobiographical accounts of his breakdown and life vary

wildly. Sherwood Anderson Remembered offers an intimate account of Anderson and the impressions he made on his contemporaries. The anecdotes collected in this volume constitute some of the best and most vivid assessments of his personality and work available. Together they create a richly detailed account of an individual who left an indelible mark on those touched by his presence and his words.

The greatest catastrophe in intellectual history was to regard physics as real and mathematics as an unreal abstraction. In fact, mathematics is noumenal (true) reality, and physics is phenomenal (illusory) reality. Mathematics tells you what things are in themselves, and physics tells you how they appear to us. Mathematics is the perfect ground of existence, defined by the God Equation. It's the source of causation, determinism and objective reality; all of the things now

formally denied by physics, which claims that observable reality is indeterministically born of unreal, potentiality wavefunctions. It's time to replace the scientific method with the mathematical method. It's time to recognize that true reality is intelligible, not sensible; noumenal, not phenomenal; unobservable, not observable; metaphysical, not physical; hidden, not manifest; rationalist, not empiricist; necessary, not contingent. Don't follow the crowd. Think for yourself.

Katrina, desperate to land her dream job, tells her boss she is married. Her imaginary husband Paul, is based on a man whom she once had passionate one-night affair with six months ago. But when he turns up at her office one day he gets swept along with the lie. Then they are invited by the
