<p>This basic, no-nonsense book is a necessity for all firefighters assigned to the truck, as well as members of fire departments who perform the numerous responsibilities of the truck on the fireground. Throughout the book, training tips are included to help you perform the various operations efficiently and effectively. Includes a study guide.</p>

This book contains the papers presented at the International Joint Conference on Mechanics, Design Engineering and Advanced Manufacturing (JCM 2018), held on 20-22 June 2018 in Cartagena, Spain. It reports on cutting-edge topics in product design and manufacturing, such as industrial methods for integrated product and process design; innovative design; and computer-aided design. Further topics covered include virtual simulation and reverse engineering; additive manufacturing; product manufacturing; engineering methods in medicine and education; representation techniques; and nautical, aeronautics and aerospace design and modeling. The book is divided into six main sections, reflecting the focus and primary themes of the conference. The contributions presented here will not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work; they are also intended to stimulate new research dircetions, advanced applications of the methods discussed, and future interdisciplinary collaborations.

This book uses the work of Bolognese physician and anatomist Gaspare Tagliacozzi to explore the social and cultural history of early modern surgery. It discusses how Italian and European surgeons' attitudes to health and beauty – and how patients' gender – shaped views on the public appearance of the human body. In 1697, Gaspare Tagliacozzi published a two-volume book on reconstructive surgery of the mutilated parts of the face. Studying Tagliacozzi ' s surgery in context corrects widespread views about the birth of plastic surgery. Through a combination of cultural history, microhistory, historical epistemology, and gender history, this book describes the practice and practitioners considered to be at the periphery of the "Scientific Revolution." Historical themes covered include the writing of individual cases, hegemonic and subaltern forms of masculinity, concepts of the natural and the artificial, emotional communities and moral economies of pain, and the historical anthropology of the culture of beauty and the face and its disfigurements. The book is essential reading for upper-level students, postgraduates, and scholars working on the history of medicine and surgery, the history of the body, and gender and cultural history. It will also appeal to those interested in the history of beauty, urban studies and the Renaissance period more generally.

We gratefully acknowledge the financial support of COST (European Cooperation in Science and Technology), funded by the Horizon 2020 Framework Programme of the European Union. Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability, and it appears scattered in scientific publications where the description is often intertwined with the analysis. In general, comprehensive grammars are a rarity. The SignGram Blueprint is an innovative tool for the grammar writer: a full-fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way, and with the highest scientific standards. The work builds on the existing knowledge in Descriptive Linguistics, but also on the insights from Theoretical Linguistics. It consists of two main parts running in parallel: the Checklist with all the grammatical features and phenomena the grammar writer can address, and the accompanying Manual with the relevant background information (definitions, methodological caveats, representative examples, tests, pointers to elicitation materials and bibliographical references). The areas covered are Phonology, Morphology, Lexicon, Syntax and Meaning. The Manual is endowed with hyperlinks that connect information across the work and with a pop-up glossary. The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity.

This book documents the state of the art in the field of ambient assisted living (AAL), highlighting the impressive potential of novel methodologies and technologies to enhance well-being and promote active ageing. The coverage is wide ranging, with sections on care models and algorithms, enabling technologies and assistive solutions, elderly people monitoring, home rehabilitation, ICT solutions for AAL, living with chronic conditions, robotic assistance for the elderly, sensing technologies for AAL, and smart housing. The book comprises a selection of the best papers presented at the 9th Italian Forum on Ambient Assisted Living (ForitAAL 2018), which was held in Lecce, Italy, in July 2018 and brought together end users, technology teams, and policy makers to develop a consensus on how to improve provision for elderly and impaired people. Readers will find that the expert contributions offer clear insights into the ways in which the most recent exciting advances may be expected to assist in addressing the needs of the elderly and those with chronic conditions.

This book investigates the actions of marriage tribunals by analyzing the richest source of marriage suits extant in Italy, those of the Venetian ecclesiastical tribunal, between 1420 and the opening of the Council of Trent. It offers a strongly representative overview of the changes the Council introduced to centuries-old marriage practices, relegating it to the realm of marginality and deviance and nearly erasing the memory of it altogether. From the eleventh century onward, the Church assured itself of a jurisdictional monopoly over the matter of marriage, operating both in concert and in conflict with secular authorities by virtue of marriage ' s civil consequences, the first of which regarded the legitimacy of children. Secular tribunals were responsible for patrimonial matters between spouses, though the Church at times inserted itself into these matters either directly, by substituting itself for the secular authority, or indirectly, by influencing Rulings through their own sentences. Lay magistratures, for their part, somewhat eroded the authority of ecclesiastical tribunals by continuing to exercise autonomous jurisdiction over marriage, especially regarding separation and crimes strictly connected to the nuptial bond and its definition, including adultery, bigamy, and rape.
