Cognitive sciences have been involved under numerous accounts to explain how humans interact with technology, as well as to design technological instruments tailored to human needs. As technological advancements in fields like wearable and ubiquitous computing, virtual reality, robotics and artificial intelligence are presenting novel modalities for interacting with technology, there are opportunities for deepening, exploring, and even rethinking the theoretical foundations of human technology use. This volume entitled u201cCognition and Interaction: From Computers to Smart Objects and Autonomous Agentsu201d is a collection of articles on the impacts that novel 3 September Frontiers in Psychology 2019 | Cognition and Interaction interactive technologies are producing on individuals. It puts together 17 works, spanning from research on social cognition in human-robot interaction to studies on neural changes triggered by Internet use, that tackle relevant technological and theoretical issues in human-computer interaction, encouraging us to rethink how we conceptualize technology, its use and development. The volume addresses fundamental issues at different levels. The first part revolves around the biological impacts that technologies are producing on our bodies and brains. The second part focuses on the psychological level, exploring how our psychological characteristics may affect the way we use, understand and perceive technology, as well as how technology is changing our cognition. The third part addresses relevant theoretical problems, presenting reflections that aim to reframe how we conceptualize ourselves, technology and interaction itself. Finally, the last part of the volume pays attention to the factors involved in the design of technological artifacts, providing suggestions on how we can develop novel technologies closer to human needs. Overall, it appears that human-computer interaction will have to face a variety of challenges to account for the rapid changes we are witnessing in the current technology landscape.

Resource added for the Nursing-Associate Degree 105431, Practical Nursing 315431, and Nursing Assistant 305431 programs.

Written by the American Sport Education Program in conjunction with Matt Lydum and other experts from Hersheys Track & Field Games and USA Track & Field, Coaching Youth Track & Field is the only resource available today aimed at coaches of athletes ages 14 and under. Coaching Youth Track & Field includes activities specifically designed for young track and field athletes and fundamentals of all of the events in track and field (USATF and Hersheys Track and Field Games). Coaching Youth Track & Fields 73 activities and 32 age-specific coaching tips are sure to jump-start your planning and practices and help you overcome any hurdle encountered during the season. Plus, sequenced and specific chapters help you learn, retain, and reference in a flash. Endorsed by USATF and named the official handbook of Hersheys Track & Field Games, this book a must-read as you prepare to meet the challenges and enjoy the rewards of coaching young athletes.

"Transform your body in just 12 weeks. Take the challenge"--Cover.

The two volumes set LNCS 10913-10914 of SCSM 2018 constitutes the proceedings of the 10th International Conference on Social Computing and Social Media, SCSM 2018, held as part of the International Conference on Human-Computer Interaction, HCI 2018, held in Las Vegas, NV, USA, in July 2018. The total of 1171 papers and 160 posters presented at the 14 collocated HCI 2018 conferences. The papers were carefully reviewed and selected from 4346 submissions. These papers which are organized in the following topical sections: social media user experience, individual and social behavior in Social Media, privacy and ethical issues in Social Media, motivation and gamification in Social Media, social network analysis, and agents, models and algorithms in Social Media.

This book provides the latest research and design-based recommendations for how to design and implement a technology training program for older adults in Continuing Care Retirement Communities (CCRCs). The approach in the book concentrates on providing useful best practices for CCRC owners, CEOs, activity directors, as well as practitioners and system designers working with older adults to enhance their quality of life. Educators studying older adults will also find this book useful Although the guidelines are couched in the context of CCRCs, the book will have broader-based implications for training older adults on how to use computers, tablets, and other technologies.

The essential health behavior text, updated with the latesttheories, research, and issues Health Behavior: Theory, Research and Practice provides athorough introduction to understanding and changing healthbehavior, core tenets of the public health role. The first book of its kind devoted to this topic, this comprehensive text/reference presents state-of-the-art research and reviews current challenges in the application of computer vision to problems in sports. Opening with a detailed introduction to the use of computer vision across the entire life-cycle of a sports event, the text then progresses to examine cutting-edge techniques for tracking the ball, obtaining the whereabouts and pose of the players, and identifying the sport being played from video footage. The work concludes by investigating a selection of systems for the automatic analysis and classification of sports play. The insights provided by this pioneering collection will be of great interest to researchers and practitioners involved in computer vision, sports analysis and media production.
