The Huainanzi: Liu An, King of Huainan: A Guide to the ...

The Huainanzi is an ancient Chinese text that consists of a collection of essays that resulted from a series of scholarly debates held at the court of Liu An, Prince of Huainan, sometime before 139 BC. The Huainanzi blends Daoist, Confucianist, and Legalist concepts, including theories such as yin and yang and Wu Xing theories. The Huainanzi's essays are all connected to one primary goal: attempting to define the necessary conditions for perfect socio-political order. It concludes that perfect s

Compiled by scholars at the court of Liu An, king of Huainan, in the second century B.C.E, "The Huainanzi" is a tightly organized, sophisticated articulation of Western Han philosophy and statecraft.

Compiled by scholars at the court of Liu An, king of Huainan, in the second century B.C.E, The Huainanzi is a tightly organized, sophisticated articulation of Western Han philosophy and statecraft. Outlining "all that a modern monarch needs to know," the text emphasizes rigorous self-cultivation and mental discipline, brilliantly synthesizing for readers past and present the full spectrum of early Chinese thought. The Huainanzi locates the key to successful rule in a balance of broad knowledge, diligent application, and the penetrating wisdom of a sage. It is a unique and creative synthesis of Daoist classics, such as the Laozi and the Zhuangzi; works associated with the Confucian tradition, such as the Changes, the Odes, and the Documents; and a wide range of other foundational philosophical and literary texts from the Mozi to the Hanfeizi. The product of twelve years of scholarship, this remarkable translation preserves The Huainanzi's special rhetorical features, such as parallel prose and verse, and showcases a compositional technique that conveys the work's powerful philosophical appeal. This path-breaking volume will have a transformative impact on the field of early Chinese intellectual history and will be of great interest to scholars and students alike.

In 2010, the editors of this volume completed the first unabridged English-language translation of the Huainanzi, opening exciting new pathways in the study of philosophy, Asian studies, political science, and Asian literature. This abridgement contains essential selections from each of the Huainanzi's twenty-one chapters and adds a new introduction and chapter descriptions. The text represents a remarkable synthesis of Daoist classics, such as the Laozi and the Zhuangzi; books associated with the Confucian tradition, such as the Changes, the Odes, and the Documents; and a range of other foundational philosophical and literary works, from the Mozi to the Hanfeizi. The abridgement preserves the Huainanzi's special rhetorical features, such as its parallel prose, verse, and unique compositional techniques. The Essential Huainanzi continues to increase awareness of this brilliant work and change our understanding of early Chinese history.

The Huainanzi has in recent years been recognized by scholars as one of the seminal works of Chinese thought at the beginning of the imperial era, a summary of the full flowering of early Taoist philosophy. This book presents a study of three key chapters of the Huainanzi, ￼The Treatise on the Patterns of Heaven,￼ ￼The Treatise on Topography,￼ and ￼The Treatise on the Seasonal Rules,￼ which collectively comprise the most comprehensive extant statement of cosmological thinking in the early Han period. Major presents, for the first time, full English translations of these treatises. He supplements the translations with detailed commentaries that clarify the sometimes arcane language of the text and presents a fascinating picture of the ancient Chinese view of how the world was formed and sustained, and of the role of humans in the cosmos.

Shang, Yang. The Book of Lord Shang. A Classic of the Chinese School of Law. Translated from the Chinese with Introduction and Notes by Dr. J.J.L. Duyvendak. London: Arthur Probsthain, 1928. xiv, 346 pp. Reprinted 2003 by The Lawbook Exchange, Ltd. LCCN 2002024318. ISBN 1-58477-241-7. Cloth. \$80. * Reprint of Volume XVII in Probsthain's Oriental Series. With a Chinese index and an index of names and references. The Book of Lord Shang was probably compiled sometime between 359 and 338 BCE. Along with the Han Fei-Tzu, it is one of the two principal sources of Legalism, a school of Chinese political thought. Legalism asserts that human behavior must be controlled through written law rather than through ritual, custom or ethics because people are innately selfish and ignorant. The law is not effective when it is based on goodness or virtue; it is effective when it compels obedience. This is essential to preserve the stability of the State. Roscoe Pound recommended this book for the study of old Chinese law in Outlines of Lectures on Jurisprudence (5th ed.) 235.

The Han dynasty Huainanzi is a compendium of knowledge. This edited volume follows a multi-disciplinary approach to explore how and why the Huainanzi was produced and how we should interpret the work.

Events on Wall Street and Main Street reveal that some business leaders make dramatically unethical self-serving decisions that ignore the public interest. How can business schools educate future business leaders to make ethical decisions? Unfortunately, most business schools fail in teaching ethical decision-making. They erroneously assume that such decision-making is primarily conscious and reason-based, reflecting the western cultural orientation toward science and logic. In this book, Thomas Cushman cites neurological findings showing that unconscious processes and emotions play a much more significant role than reason in making ethical decisions. Cushman urges business schools to teach a modified form of emotional intelligence, linked with research-supported contemplative practices from the great meditative traditions. This book details the author's ethics curriculum and explains its successful application at the Sauder School of Business at the University of British Columbia. This fascinating, interdisciplinary, and highly practical curriculum integrates philosophy (virtue ethics), Daoist thinking, psychology, and neuroscience. This curriculum intends to transform the way business schools teach decision making. Such an effort might just transform the way we do business.

Brings early Daoist writings into conversation with contemporary contemplative studies. In The Contemplative Foundations of Classical Daoism, Harold D. Roth explores the origins and nature of the Daoist tradition, arguing that its creators and innovators were not abstract philosophers but, rather, mystics engaged in self-exploration and self-cultivation, which in turn provided the insights embodied in such famed works as the Daodejing and Zhuangzi. In this compilation of essays and chapters representing nearly thirty years of scholarship, Roth examines the historical and intellectual origins of Daoism and demonstrates how this distinctive philosophy emerged directly from practices that were essentially contemplative in nature. In the first part of the book, Roth applies text-critical methods to derive the hidden contemplative dimensions of classical Daoism. In the second part, he applies a "contemplative hermeneutic" to explore the relationship between contemplative practices and classical Daoist philosophy and, in so doing, brings early Daoist writings into conversation with contemporary contemplative studies. To this he adds an introduction in which he reflects on the arc and influence on the field of early Chinese thought of this rich vein of scholarship. The Contemplative Foundations of Classical Daoism brings to fruition the cumulative investigations and observations of a leading figure in the emerging field of contemplative studies as they pertain to a core component of early Chinese thought. Harold D. Roth is Professor of Religious Studies and the Founder and Director of the Contemplative Studies Program at Brown University. His books include The Textual History of the Huai-nan Tzu; Original Tao: Inward Training (Nei-yeh) and the Foundations of Taoist Mysticism; Daoist Identity: History, Lineage, and Ritual (coedited with Livia Kohn); The Huainanzi: A Guide to the Theory and Practice of Government in Early Han China and The Essential Huainanzi (cotranslated and edited with John S. Major, Sarah A. Queen, and Andrew Seth Meyer).

By blending multiple strands of thought into one ideology, Chinese Syncretists of the pre-imperial period created an essential guide to contemporary ideas about self, society, and government. Merging traditions such as Ruism, Mohism, Daoism, Legalism, and Yin-Yang naturalism into their work, Syncretists created an integrated intellectual approach that contrasts with other, more specific philosophies. Presenting the first full English translation of the earliest example of a Syncretist text, this volume introduces Western scholars to both the brilliance of the syncretic method and a critical work of Chinese leadership. Written by Shi Jiao, China's first syncretic thinker, during the Warring States Period of 481 to 221 BCE, Shizi is similar to Machiavelli's The Prince in that it dispenses wisdom to would-be rulers. It stresses the need for leaders to be detached and objective. It further encourages self-cultivation and effective government, recommending that rulers maintain self-discipline, hire reliable people, delegate power transparently, and promote others in an orderly fashion. The people, it is argued, will emulate their leader's wisdom and virtue, and a just and peaceful state will result. Paul Fischer provides an extensive introduction and a chapter-by-chapter summary and analysis of the text-outlining the importance of syncretism in Chinese culture-and explores the text's particular features, authorship, transmission, loss, and reconstruction over time. The Shizi set the stage for a long history of syncretic endeavor in China, and its study provides insight into the vital traditions of early Chinese philosophy. It is also a template for interpreting other well-known works, such as the Confucian Analects, the Daoist Laozi, the Mohist Mozi, and the Legalist Shang Jun shu.

Contemporary scholars of Chinese philosophy often presuppose that early China possessed a naturalistic worldview, devoid of any non-natural concepts, such as transcendence. Challenging this presupposition head-on, Joshua R. Brown and Alexis McLeod argue that non-naturalism and transcendence have a robust and significant place in early Chinese thought. This book reveals that non-naturalist positions can be found in early Chinese texts, in topics including conceptions of the divine, cosmogony, and apophatic philosophy. Moreover, by closely examining a range of early Chinese texts, and providing comparative readings of a number of Western texts and thinkers, the book offers a way of reading early Chinese Philosophy as consistent with the religious philosophy of the East and West, including the Abrahamic and the Brahmanistic religions. Co-written by a philosopher and theologian, this book draws out unique insights into early Chinese thought, highlighting in particular new ways to consider a range of Chinese concepts, including tian, dao, li, and you/wu.

Translated from classical Chinese texts for the first time comes this authoritative guide to two of China's most enduring ancient arts.
