Experimental Design By Cochran And

Gertrude Cox and William Cochran were both famous statisticians who were extremely good writers. This was the book on experimental designs in 1958 with a wealth of information on randomized block, factorial and fractional factorial designs. It is still a very useful and practical reference.

Experimental Design Summary
Experimental Design Summary
Experimental design refers to how participants are allocated to the different conditions (or IV levels) in an experiment. There are three types: 1. Independent measures / between-groups: Different participants are used in each condition of the independent

Cochran, William Gemmell ...

The design of experiments (DOE, DOX, or experimental design) is the design of any task that aims to describe and explain the variation of information under conditions that are hypothesized to reflect the variation. The term is generally associated with experiments in which the design introduces conditions that directly affect the variation, but may also refer to the design of quasi-experiments ...
