Ubani Obinna. -. March 2, 2020. Every code of practice for bridge design has provision for modelling of traffic action as moving loads. This is similar to the idea of influence lines, where the wheel load action effect at the critical location of the influence line/surface is used in design combination. In this post, we are going to show how you can model bridges, and apply moving load on Staad Pro according to the principles of Eurocodes.
