Indoor Thermal Comfort Perception: A Questionnaire Approach Focusing on Children (Springerbriefs in Applied Sciences and Technology) 2015th Edition by Kristian Fabbri (Author) ISBN-13: 978-3319186504

Indoor Thermal Comfort Perception: A Questionnaire ...

About this book: About the authors. About this book. Providing a methodology for evaluating indoor thermal comfort with a focus on children, this book presents an in-depth examination of children's perceptions of comfort. Divided into two sections, it first presents a history of thermal comfort, the human body and environmental parameters, common thermal comfort indexes, and guidelines for creating questionnaires to assess children's perceptions of indoor thermal comfort.

Indoor Thermal Comfort Perception

The most important environmental factors contributing to thermal comfort are: Air temperature; Radiant temperature (i.e. the temperature of the walls, floor, windows etc); Humidity; Air speed; The amount of physical activity; and; The amount and type of clothing worn. The recommended temperature range to optimise indoor thermal comfort for most people is 20 °C to 26 °C*. This temperature range is appropriate for the sedentary or near sedentary physical activity levels that are typical of ...

Indoor thermal comfort

Indoor Thermal Comfort Perception - kristianfabbri.com

Providing a methodology for evaluating indoor thermal comfort with a focus on children, this book presents an in-depth examination of children's perceptions of comfort.

Indoor thermal comfort perception: A questionnaire ...

In order to take the participants' TPV into account, thermal comfort is defined as slightly warm, neutral, or slightly cool (TCV = '3':'5'), as well as the participant preferring 'No Temperature ...

Perceptions and Expectations of Thermal Comfort in the ...

As perceived comfort was associated with personal, social, and building factors, perceived comfort would be much more than the average of the perceived indoor air quality, noise, lighting, and thermal comfort.

Perceived Indoor Environment and Occupants' Comfort in ...

The relationship between indoor environmental conditions in general and student achievement is well established; however, the specific role of thermal comfort is less well understood . The ASHRAE 55 Standard defines thermal comfort as a condition of mind which expresses satisfaction with the thermal environment [15].

Students' Perceived Heat-Health Symptoms Increased with ...

The six factors affecting thermal comfort are both environmental and personal. These factors may be independent of each other, but together contribute to an employee's thermal comfort....

The six basic factors - HSE

Recommendations for indoor thermal requirements have been based upon verbalized responses on traditional assumptions that (1) minimal thermoregulatory activity may be equated to maximum subjective acceptability (2) sensations and levels of discomfort are synonymous and (3) perception of warmth is exclusively the function of thermal stimulus — physiological response.

Towards a psycho-physiological model of thermal perception ...

In many studies, the RH effect is considered to affect thermal comfort . . . a perception of indoor air quality , health of the occupants and energy consumption . The RH effect has a big influence on the heat balance for the human body at high metabolic rates, in hot environments (high operative temperatures) and under transient conditions [69] .

A review of thermal comfort models and indicators for ...

Providing a methodology for evaluating indoor thermal comfort with a focus on children, this book presents an in-depth examination of children's perceptions of comfort. Divided into two sections, it first presents a history of thermal comfort, the human body and environmental parameters, common thermal comfort indexes, and guidelines for creating questionnaires to assess children's perceptions of indoor thermal comfort.

Indoor Thermal Comfort Perception | SpringerLink

used by researchers to establish the perception of thermal comfort in indoor environments are the adaptive, the adaptive-variable, and the standard or Fanger model. The adaptive model bases its principles on the adaptability of the human body , establishing that when there are changes in internal

Experimental Study and Analysis of Thermal Comfort in a ...

An individual's comfort level in a given environment may change and adapt over time due to psychological factors. Subjective perception of thermal comfort may be influenced by the memory of previous experiences. Habituation takes place when repeated exposure moderates future expectations, and responses to sensory input.

Thermal comfort - Wikipedia

A full thermal-comfort study was necessary to experimentally validate whether thermal comfort could be achieved in the hot, humid outdoors. A total of 55 individuals participated in a subjective thermal-comfort study in the Cold Tube carried out from January 8 through January 27, 2019.

Membrane-assisted radiant cooling for expanding thermal ...

Thermal comfort is the human experience of satisfaction with the thermal environment and it is based by a person's thermal sensation . Thus, thermal comfort refers to the perception process in which the brain interprets thermal sensation. In previous studies, thermal sensation was not affected by noise

Cross-modal effects of noise and thermal conditions on ...

Abstract This review examines scientific literature on the effect of gender on indoor thermal comfort. Gender differences have been generally considered to be small and insignificant but this review shows that a growing number of studies have found significant differences in thermal comfort between the genders.

Thermal comfort and gender: a literature review ...

As evidenced by Parsons [14] the perception of thermal comfort changes if referring to men or women due to natural differences, but also with relation to different behaviours or habits: females tend to be cooler than males in cool conditions because they are physiologically more sensitive to temperature.
