Tamron 28 200mm F 3

The Tamron 28-200mm f2.8-5.6 Di III is a small and light all-in-one zoom designed for mirrorless cameras with full-frame sensors. At the time of writing, it was only available in Sony E-mount, and costs more in some regions than Sony's own FE 24-240mm super-zoom, while lacking its broader zoom range and optical stabilization.

Tamron 28-200mm f2.8-5.6 Di III RXD review - | Cameralabs

The Tamron 28-200mm provides a remarkable 19.3" minimum focusing distance throughout the entire zoom range, and a macro magnification of 1:4 at 200mm. For example, you can shoot an object about the size of a postcard and fill the frame completely.

The world's smallest, most lightweight 28-200mm high magnification zoom lens. With a minimum focal distance over the entire zoom area of 49cm, and a maximum magnification of 1:4 (at 200mm), this remarkable lens achieves high magnification zoom performance with the compact size of a standard zoom lens. Through XR (Extra Refractive Index) glass and

FM Reviews - Tamron 28-200MM F/3.8-5.6 XR Aspherical (IF ...

manufacturer description The story of Tamron's all-in-one zoom lenses begins with the Model 71D, an SLR lens introduced in 1992. This lens featured a focal length of 28-200mm and a 7.1x zoom, one of the highest among SLR lenses in those days. Development of this lens began in 1989, nearly three years prior to its release.

Tamron AF 28-200mm F3.8-5.6 Aspherical A-mount lens info

(From Tamron lens literature) The world's smallest, most lightweight 28-200mm high magnification zoom lens. With a minimum focal distance over the entire zoom area of 49cm, and a maximum...

Tamron 28-200mm f/3.8-5.6 XR Aspherical IF Macro AF Review

I've recently acquired a well-worn copy of a Tamron 28-200mm zoom for pocket change and it seems like a good investment. It didn't include an owner's manual so I'll make an educated guess and say it's the UPGRADED model because it close-focuses to about 3 feet (the original Tamron 28-200, introduced in '91 or so, had a minimum focus of 7 or 8 ...

Tamron AF28 200mm F/3.8 5.6 LD (Asp) IF Super 35mm Zoom ...

The Tamron 28-200mm is lightweight at 12.5oz (354g), small for a zoom lens, and is only three inches tall. This makes it a little more discrete than some other lenses for street photography. Although since I am tall and have bright red hair, discretion isn't something I value particularly highly.

An oldie but a goodie - why the Tamron 28-200mm lens is my ...

Tamron is changing hearts and minds with its 28-200mm f/2.8-5.6 Di III RXD (\$729), available exclusively for Sony camera systems. It couples a sturdy build with very good optical performance,

and...

Tamron 28-200mm f/2.8-5.6 Di III RXD Review | PCMag

In 1992, Tamron launched its first all-in-one zoom lens, the AF 28-200mm F/3.8-5.6 Aspherical (Model 71D). At that time, the Model 71D astonished the world and overturned the existing perception of all-in-one zoom lenses as being large, heavy and delivering poor image quality.

TAMRON | 28-200mm F/2.8-5.6 Di III RXD (Model A071)

Tamron is expanding its line of compact, affordable lenses for the Sony full-frame camera system with the 28-200mm f/2.8-5.6 Di III RXD. It's got a long zoom ratio, about 7.1x, so you won't have to...

Tamron Unveils 28-200mm Zoom for Sony Full-Frame Cameras

In 1992, Tamron demonstrated breakthrough innovation with the release of the AF 28-200mm F/3.8-5.6 Aspherical (Model 71D), a compact and lightweight all-in-one zoom lens. The amazingly compact size, light weight and reasonable price immediately became wildly popular with photographers around the world.
