probabilities of future movements in the market by studying price action through the use of indicators and chart patterns. Someone who uses technical analysis is called a technical analyst. Traders who use technical analysis are known as technical traders.

What is Technical Analysis in Forex? -
HowToTrade.com

Download Ebook Technical

Technical analysis is a method utilized in forex trading to examine and predict price movements of currencies, by using and analysing historical price charts and market statistics. It is assumed that if a trader is able to determine previous market patterns, they can fairly accurately predict future price trends.

When used in conjunction with other technical indicators such as support and resistance or Fibonacci, pivot points can be an effective trading tool. Pivot points are calculated using the high, low and close prices of a previous day, week or month. Three different levels of support and resistance are calculated above and below the pivot point.
